SPRY WORKING FOR CAPITOL

Governor Said to Be Interview ing Heavy Taxpayers of City and County.

IS EXPECTED TO MAKE ANNOUNCEMENT SOON

Large Number of Capitol Hill Residents Want a Better Street Car Service.

The proposition to erect a capital building in Salt Lake City is one of the important matters to come before the legia ature, which will meet January P.

Gov. William Spry, it is understood, i enthusiastically in favor of the building. s he was two years ago, but he is in loubt as to just how to approach the intter at the present.

matter at the present.

The vote two years ago on the measure to levy the tax for a building was defeated by a large majority. Weler county voting overwhelmingly against it. At the same time, the vote was such that if Salt Lake county had got out its voting atrength, the proposition would have carried. At the recent election a constitution

At the recent election a constitutional sinendment providing that the state might increase its bonded indebtedness was adopted by the people. This paves the way for action by the incoming legislature which can issue the necessary bonds to start the work on the new capitel.

Governor Spry is now understood to be interviewing the heavy taxpavers in this city and county respecting the matter and be hopes to get them in line for the capitol building to such an extent that the voting of the bonds by the legislature will be assured. The governor, it is understood, will be ready to make an announcement in relation to the matter within as few days.

Upon the assumption that the capitol building is a certainty residents of Capital hill to the number of more than 30c are taking steps to secure before street car service and have circulated a 1 litton, addressed to W. H. Bancroft, president of the Utah Light and Railway company, asking him to assist them in the matter.

Schulder, Gideon Snyder, E. F. Hanna and R. E. Dorlus has been appointed to take the matter up with Bancroft.

The petitioners have virtually agreed upon a tentative route for the new line. They say that the line should run north on Main street, east on Second North and north on East Capitol.

It also has been suggested by the committee that the line can make a circle in and about the capitol grounds that will be a valuable addition to the sight-seeing part of the city covered by street cars.

much trouble. Sold by all dealers.

WASHINGTON, Jan. 2.—Trapping ants is a new method of elimination of insect pests the department of agriculture experts are watching. In Louisiana and California the Argentina of the control of the cont tine ant, the most persistent ever known by the biologists of the government, has been damaging horticulture by carrying scale insects from infested into the uninfested trees, and all anti-ant campaigns have so far failed as to this

According to the department, the ant probably was adopted into this country during the New Orleans cotton exposition in 1884. The ants spread through the city, proved a great nuisance to the stores and houses and swarmed into the houses to such an extent, according to the department, "that it was dangerous to let babies go to sleep in their cradles because the ants would get in their eyes and travel all over then At Baton Rouge they were particularly dangerous and troublesome."

California authorities, who are col-laborating with the department, have considered a trapping process that they think favorably of and in Louisiana flooding may control the pest.

COMPRESSED FORAGE NOW AIM OF ARMY AUTHORITIES

WASHINGTON, Jan. 2.—Now that considerable success has been made in perfecting a compressed ration for the axiomatic policy of lightening the burden of moving troops, the war department is axiomatic policy of lightening the burden of moving troops, the war department is experimenting with a compressed forage ration. Lieut Nathan C. Shiverick of the third cavalry at Fort Wingate, N. M., is the inventor of the process, and on behalf of the government has been conducting important tests. A sample of the ration has been received at the war department, together with a report of the experiments made in New Mexico. Lieutenant Shiverick claims that ten pounds of this ration are equal to twelve pounds of each and that it can be packed for transportation so as to save much in space and weight. Further tests of the forage ration will be made by the horses of two troops of cavalry in the United States and two troops in the Philippines. At the same time, an investigation will be made to determine the keeping quaities of the material.

The quartermaster general of the same has recommended that Lieutenant Shiverick be permitted to have the precess of preparing forage ration patented, with the understanding that ne will grant the United States the unrestricted license to prepare it for government use.
